REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art of records do not show a method of recognizing an object based on pattern matching using gray-scale normalized correlation method comprises the method of calculating normalized correlation coefficient between the reference image and the input image using the function which comprises the steps of: "calculating an autocorrelation coefficient of the reference image by assigning a density distribution value of a background area of the reference image to a first constant value and by assigning a density distribution value of a foreground area of the reference image to a second constant value different from the first constant value; calculating a cross correlation coefficient between the reference image and the input image for the foreground and the background areas; and obtaining the normalized correlation coefficient by dividing the cross correlation coefficient by a product of the autocorrelation coefficients of the input image and the reference image." in combination with other limitations.

2. The Applicant also amended the claim's language to comply 35 U.S.C. 112 and 35 U.S.C. 101 and thus the application is now under the condition for allowance.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
